NS-7000

IMIDAZOLINE
CORROSION INHIBITOR

NS-7000 is a polyamido-imidazoline corrosion inhibitor base used in formulations of both water and oil soluble corrosion inhibitors. Salting of the amine with organic acids will produce a very effective water soluble finished product. Formulations using this product have proven to be very successful in control of corrosion due to the presence of CO₂, H₂S, organic acids and inorganic acids.

Not Regulated by D.O.T.

Physical Properties:

Chemical Description	Corrosion Inhibitor
Physical State @ 77°F	Liquid
pH	10.5 to 12.5
Pour Point, °F	23
Flash Point, °F	>200
Specific Gravity @ 77°F	0.93 to 0.95
Lbs/Gallon	7.73 to 7.90
Activity	100%

Solubility:

Soluble
Hydrocarbon Solvents

Non Soluble
Water (Dispersible)
