

NS-9300
FOAMING AGENT

NS-9300 is a light amber liquid formulation of a foaming agent in concentrated form. **NS-9300** is used in formulations for unloading gas wells. This product may be diluted to form a field strength product or used as a base material to formulate field strength products. Laboratory evaluations need to be performed to determine the active strength of product needed. NovaStar LP is basic in this type of chemistry providing base materials for the formulation of this product and other products in this same class.

Flammable Liquid

Physical Properties:

Chemical Description	Surfactant
Physical State @ 77°F	Liquid
pH	7.0 to 8.0
Pour Point, °F	32
Flash Point, °F	90
Specific Gravity @ 77°F	1.05 to 1.06
Lbs./Gallon	8.73 to 10.06
Activity	100%

Solubility:

Soluble
Water
Alcohols

Non Soluble
Hydrocarbons
(unless forced)
